SATURDAY, May 25. Prices of stocks drifted around in an all ess and idle way upon a reduced volum of transactions in the first hour and a ha of Stock Exchange business that elapse to-day before the appearance of the week bank statement. During this time, how ever, they maintained as a rule the strengt shown yesterday. Certain stocks wer heavy, particularly the Erie, Souther Railway preferred and the United State Steel shares, and the general declining movement that set in after the publication of the bank statement was led by thes in the Erie stocks was the announcement unexpectedly made this morning that strike involving about 3,000 machinists ha been ordered on the Erie system. Then were absolutely no known development that could account for the selling of the United States Steel stocks, and Wall Stree goals was forced to content itself with th theory that the fall in the price of the stock represented liquidation by individuals wh were desirous for various reasons of raisin, money. To-day's bank statement was de cidedly of the sort known as "better than expected," since it exhibited an increase in teach of nearly \$6,000,000, which with a increase of only \$1,500,000 in loans served to swell the bank surplus by \$4,616,200 and made the figures of the total surplus compare not unfavorably with those of corresponding dates in previous years. Neverheless, as stated, pressure upon the market increased after the items of the bank return were published and declines running to a full point or more in most instances

were made in the active stocks. Consolidated Gas declined 2% points on further discussion of the company's legal status. The wheat market to-day was as irregular as ever, opening lower, but closing moder-

ately higher than it did yesterday. Trading on the Stock Exchange was of course utterly professional throughout. Bather better news from the agricultural districts, bulletins of a more unfavorable character regarding foreign crops, announcements of new security issues by corporations and unconfirmed rumors regarding further money raising plans of a similar nature, an unimportant Stock Exchange failure, the passage by the State Legislature of the public utilities bill, the decision in favor of the Consolidated Gas Company by the master appointed by the United States courts to hear the evidence in the suit begun by the company to test the constitutionality of the eighty cent gas law and the steps taken by the Attorney-General of the State to test the validity of ithe company's franchises comprised the leading events of the week from a financial point of view. It could not be said that any of hem exercised any wide influence upon the stock market, and what the stock market itself chiefly exhibited was a continual diminution of the interest in it taken by the outside public and of neglect as wel by the large financial interests. The sale by the Chicago, Rock Island and Pacific Railway Company of \$10,000,000 of its first and refunding mortgage bonds for the purpose of taking up \$7,500,000 of outstanding short term notes and of providing new money for improvement work merited somewhat more attention that it received as being the first issue by a railway company of a straightaway long term bond at a relatively high rate of interest. It is held by many of our most sagacious students of financial affairs that if the precedent thus set had been established earlier in the face of existing exigencies it would have been better for everybody concerned. The bonds in question will presumably be taken by investors in short order and the necessity of a continual reborrowing of money by the company to pay off short term loans will be aveided. The incident also suggests that son of the current inability of rail way companies to obtain money on easy terms is that many of these companies are no longer able to sell more than a trifling quantity of bonds that can legally be purchased by the savings banks and insurance companies. The two classes of corporations named form by far the largest single purchasers of railway securities in the country, and when their buying is restricted either by lack of high grade offerings or, as it has been in the case of the insurance companies, by recent legislation, the country's railway bond market is quick to reflect the fact. It was thought generally this week that statements of railway net earnings for the month of April, soon to be published, would make a much better showing than did those of the preceding month. In the case of the anthracite roads earnings have been increased, at least comparatively, owing to the fact that last year the revenues of all these railways were curtailed by labor troubles. On the other hand, official reports of railway net earnings for March, as just received, are more or less unsatisfactory. The Financial Chronicle to-day computed that although there had been a gain in railway gross earnings for March of 10 per cent., the gain in net was only 1 per cent. The record of railway net earnings for April when it comes to hand will therefore be read with much interest for the light thrown by it upon the highly important question whether the increase in railway operating expenses that has been so noticeable during the present year has been due more to increase of wages to employees and other standing charges than to especial expenses caused by extraordinary weather conditions. There was much talk during the week of possible gold exports from the country and developin the exchange market were obviously favorable to these transactions. Bankers here would not be surprised to hear news of gold shipments from this side at any time; but in the present easy state of the call money market the loss of a moderate quantity of gold by the local banks would probably not be considered in Wall Street as an "adverse influence." It appears still unsettled whether the Secretary of the Treasury will withdraw from the national banks any considerable portion of the Government funds preliminary to paying off the national bonds falling due on July 1. It is to be hoped that the Secretary will decide to draw checks from the banks directly for such part of the Government deposits as he proposes to recall in consequence of this necessity and that he will not yield to the requests made to

ernment over and above a fair "working New York Stock Exchange Sales, May 25. CLOSING PRICES OF UNITED STATES BONDS.

Total and the same

him to withdraw money from the banks for the purpose of stiffening money rates here and thus preventing gold exports. It is strongly felt in conservative financial cir-

cles that the policy ought to be adopted by the Treasury Department once and for

all of leaving constantly in the national

banks all the money received by the Gov-

THE	rrmm		

THE CURB MARKET.

There was a fair amount of business done in curb securities to-day during the two hours session and prices were generally steady. Nipissing was quite strong, moving up nearly a point, and Greene Cananea, Boston, Butte and Cumberland-Ely all opened fractionally better. Later quotations, however, were usually a little lower. During the first part of the week the curb market was active and weak, prices of all the leading stocks experiencing sharp declines of from 1 to 3 points on a considerable volume of liquidation. The decline embraced the whole list and was particularly heavy in the copper shares, Nipissing and Standard Oil. Activity in the market fell off to about half its previous volume in the last two sessions of the period, and the market became much steadler, good recoveries taking place in all departments.

Commission with the Land

THE COTTON MARKET. A' Moderate Advance-Further Ralus and Bad Crep Reports-Bearish Pressure. It was a case of leading bears versus nature. Bears furnished selling orders and nature furnished rains all over the belt. Nature won. Still the advance was not great for selling was persistent, particularly in October and December. There are some large shorts here, it is understood, who have not yet got back their lines. The weather during the week was in the main favorable, but of late there have been rains which are not wanted and in some sections the temperatures have and in some sections the temperatures have

been rather too cool. The weather in Texas was on the whole clear and hot maximum temperatures being in some cases from 80 to 100 degrees, but colder weather with some rain was predicted and had an influence, though Friday's prediction to the same effect was not altogether verified. In the main the impression of most people in the trade is that the crop is backward and needs a long spell of remarkably good conditions to set matters right. Conditions in the last six weeks have been remarkably bad. What is needed now is something quite as decisively the other way. At the same time speculation does not show the vira that it did a short time ago. It may wake up, during the coming week. For the last forty-eight hours the market has acted

time speculation does not show the wina that it did a short time ago. It may wake up, during the coming week. For the last forty-sight hours the market has acted a filted as though it had been bulled to a standstill. This appearance, however, is due partly to the bearish opposition. If dies the weather improves decisively and the charter of the crop reports becomes very much for or the crop reports of the crop of the crop reports of the crop of the crop reports of the c

THE GRAIN MARKETS. Prices Advance After an Easy Opening -Kansas Dry in the Main-Further Beneficial Rains in Other Sections -General Buying.

Wheat closed at an advance, owing mainly to continued dry weather in most parts of Kansas, bullish crop reports from that State, unfavorable foreign crop news, covering of shorts, buying by commission houses and support from leading Chicago bulls. The increase in the export demand reported on Friday was also not without some effect on sentiment, as tending to give color to the bullish foreign crop accounts.

Early in the day the tone was easy, owing to a decline in prices at Minneapolls and Chicago, especially at Minneapolis, where

the market showed noticeable weakness on the curb. The Northwest sold pretty freely at Chicago for a time and there was an absence of aggressive support. Commission houses, moreover, had fewer orders to buy and more to sell and pit traders hammered. There were general rains throughout the entire winter wheat belt, with the exception of Kansas. Beneficial rains too occurred in the spring wheat region.

- But the situation in Kansas was a stumbling

in the spring wheat region.

But the situation in Kansas was a stumbling block for the bears. Light rain was reported at Concordia and Kansas City, but it was very light and local. What Kansas needs and needs at once is a drenching. Without it, according to the great mass of testimony, the crop in that State is certain to suffer further serious curtailment.

At any fate, what with the gloomy reports from that State and the reports of serious damage to the Rumanian, Hugarian, Russian, and Prussian crops, early short sellers deemed discretion the better part of valor and covered freely, so prices advanced rapidly.

On the advance there was heavy realizing and frequent setbacks occurred. But the reactions met good buying orders and final prices were firm. The immediate future of the market, in the opinion of many, will be influenced largely by the weather in Kansas, though the tenor of the foreign crop news is expected to have more or less weight.

Yesterday the cables were rather better than expected. Liverpool advanced ½ to ½d, influenced by reports of dry weather in the American Southwest, unfavorable reports from Russia and Rumania, covering of shorts and the firmness of Russian offerings. The advance was checked by larger Manitoba offerings and a belief that the dry weather reports were exaggerated. Paris advanced equal to ½ to 1½c, and Berlin 1½ to 3½c. Budapest declined 3 kr.

Broomhall estimated the world's shipments for the week at 12,000,000 bush, against 14,000 last week and 11,124,000 last year. The Australian shipments were 330,000 bush, against 14,000 last year; since January 1, 25,780,000, against 14,104,000 in the same time last season. Chocago received 56 cars, including 20 of contract grade.

In discussing the situation Oscar K. Lyle

said: 'Having risen far above a parity with Europe, to which we expect to sell considerable wheat and flour, it is time to halt and digest the trades that have been inside in the great buying. Despite the news so freely given of a desperate crop situation, I do not regard to evon. Selling a selling a selling and the selling and the selling are and the selling and shorts being the selling are and the selling are selling

market. Think speculatively wheat is pretty well evened up and can be safely bought on all setbacks.

THE CORN SITUATION.

Corn advahced, influenced by the recent large shipping sales. These transactions are believed to have approximated 2,000,000 bush. Further liberal sales are expected by many. Cash interests were buying and country acceptances were light.

Patten brokers gave support and houses with Northwestern connections were good buyers at times, while nervous shorts covered in the near menths. Recent rains, according to some despatches, are retarding planting. Liverpool advanced % to %d. influenced by covering of shorts and activity on the spot. Chicago received 278 cars, including 123 of contract grade.

One firm said: "Much in explanation of the price lies in the appreciation in wheat and oats. The advance has been sympathetic. None of the features affecting the crop promise in other grains can be applied to corn. In May the crop is planted, and that it has been planted under favbrable conditions on the largest area we have ever put into that crop is our belief. A favorable April enabled great preparation under the incentive of high prices. For a time, when farmers were busy in their field work, the movement had lessened and the visible supply fallen away to the small figures of 6,844,000. Small as are these figures they are three times what they were a year ago, when they made a high price, but not so high as now presented. In the week it became manifest the interior movement would soon increase. Primary points sold freely on bids made by Chicago firms. The corn thus bought will soon appear in the receipts. On news that the country was entertaining bids extensively the market gave way from its high point, and in its latest action suggests more of a bearish movement. If there is the asserted impairment of wheat in Southeastern Europe we may expect a greater effort there in producing corn. The round kernel corn there produced is preferred by the buying countries of Europe over the flat kernelled corn o

Coffee Bull and Steady-Provisions Ir-

The coffee market was still in a rut, and at the moment there is nothing in sight that seems likely to inject new life into it. The specula-tion was confined to local traders, as it has been in the main for some time past. There was a certain amount of selling against firm was a certain amount of selling against firm offers from Brazil, but the offerings were absorbed by shorts and spot interests and prices remained about stationary. Coffee on the spot was unchanged and steady. Rio No. 7, 63,6663/2c. Futures closed unchanged with the tone steady and the sales 28,500 bags. Havre and Hamburg were unchanged. Rio was steady; receipts, 6,000 bags; stock, 902,000. Santos was unchanged; receipts, 28,000 bags; stock, 2,377,000. Prices here as follows:
